USER GUIDE

Scope

The *Chicago Tribune Index* provides comprehensive indexing of significant articles in the newspaper. It is produced under exclusive agreement with the publisher. Newspaper editions indexed correspond to those available in microform from ProQuest. The index is issued in eight monthly and four quarterly cumulations, as well as a hardbound annual volume.

Indexed material includes news items; commentaries; editorials; editorial cartoons; feature articles; sports articles; business and financial news; obituaries; reviews of books, art exhibits, dance, movies, music, restaurants, theater and television programs; and reviews of automobiles and other products.

Items not selected for indexing include articles from other newspapers indexed by ProQuest-indexed newspapers and periodicals, stock market listings, society announcements, self-help columns, meeting announcements, horoscopes, advertising, television schedules, comic strips and weather reports.

Classification Scheme

Each entry is assigned an average of two to three subject headings in the index. Personal, institutional, product and geographical names are all treated as subject headings and are interfiled alphabetically with topical headings. Names of staff writers, columnists and other writers are also included as index terms.

Material concerning foreign countries is generally indexed under the country name and other appropriate subject headings.

Subject Headings

Subject headings are based on a controlled vocabulary developed by ProQuest, containing over 11,000 general topical subject terms, and authority files containing tens of thousands of personal, corporate/institutional, geographic and product names. The vocabulary and authority files are updated continually to reflect new subject areas in current events. Most subject headings are in natural word order.

Subdivided Headings

Subject headings are divided in several ways in this index. Headings that carry a large amount of information, such as "UNITED STATES GOVT," are subdivided as needed by the names of government agencies and offices. For example, information on the Census Bureau is found under "UNITED STATES GOVT—BUREAU OF THE CENSUS." The same treatment applies to city, county and state agencies and offices: "CHICAGO (IL) GOVT," "COOK COUNTY (IL) GOVT" and "ILLINOIS GOVT."

Major topical subject headings such as "TAXATION" and "LEGISLATION" are generally subdivided geographically. For example, articles about the Chicago economy are indexed under "ECONOMIC CONDITIONS—Chicago Illinois."

A list of geographically subdivided headings follows:

AREA PLANNING & DEVELOPMENT
BUDGETING
CORRUPTION IN GOVERNMENT
DEMONSTRATIONS & PROTESTS
ECONOMIC CONDITIONS
ELECTIONS
ELECTIONS—CONGRESS
ELECTIONS—LOCAL
ELECTIONS—STATE
FOREIGN POLICY
GOVERNMENTAL REFORM
INTERNATIONAL RELATIONS—US
LEGISLATION
POLICE
PUBLIC FINANCE
SOCIAL CONDITIONS & TRENDS
TAXATION
TOURISM

Cross-References
Ample cross-references are supplied throughout the index. Generally, "See" references direct users from invalid to valid subject headings. "See also" headings direct users to related headings where additional material may appear.

subject heading: **FINANCIAL INSTITUTIONS**
cross-references: ***see also Banking; Credit Unions; Investment Banking; Regulation of Financial Institutions; Mortgage Companies; Savings & Loan Associations; Savings Banks***

Editorials
"EDITORIALS" are subdivided by topical, personal, geographic, corporate/institutional and product subheadings. For instance, editorials concerning unemployment benefits are indexed under "EDITORIALS—UNEMPLOYMENT BENEFITS."

Review Articles
Reviews of books, art exhibits, dance, movies, music, and theater and television programs are indexed under the name of the media, subdivided by the name of the work or the creator/performer, as illustrated in the following examples:

ART EXHIBITS — Dali, Salvador
BOOKS — Harry Potter and the Deathly Hallows
DANCE — Bolshoi Ballet
MUSICAL RECORDINGS — Fitzgerald, Ella

Obituaries
Obituaries are indexed under "DEATHS," which is subdivided by the names of the deceased, arranged alphabetically.

Bylines
Names of staff writers and columnists are indexed and identified by the following parenthetical information:

SCHMICH, MARY (BYLINER)
VON RHEIN, JOHN (BYLINER)

Entry Format
Individual entries under an index term appear in chronological order, except where an alphabetical arrangement is more useful. For example, entries about movies are indexed under "MOTION PICTURES," which is subdivided by titles of films, arranged alphabetically. Entries include the following information:

subject heading
cross-references (if applicable)
title of article
author of article (if applicable)
article type
descriptors
date of article
section, page

PALEONTOLOGY
A Jaw-Dropping Find: A Team of Researchers Unearths the Oldest Known Dinosaur Bones, but Their Age Is Sure to Be a Source of Controversy; by Peter Kendall; [News]; Flynn, John; Madagascar; Paleontology; *Fossils; Geology;* O 22 – 1.1

Names (Personal and Corporate)
Every effort is made by the editorial staff to verify correct forms of personal and institutional name headings used in this index. Several reference sources are consulted to establish the correct form. Personal names appear in an inverted format, e.g., "OBAMA, BARACK," and are alphabetized by the individual's surname or stage/pen name. As a general rule, the index attempts to follow usage adopted by *Chicago Tribune*.

ProQuest Newspaper Indexes

ProQuest newspaper indexes are prepared by a staff of professional editors and indexers. Comments or suggestions are always welcome and should be directed to:
